The business men that were present were in favor of a morning train from Lethbridge and an afternoon train from Cardston. It was thought by some that a night train from Lethbridge, returning from Cardston in the morning would be more satisfactory.

The Railroad Officials would make no promises, and said that no one would know what would be done until the change was made.

Herman Johnson Wins Big Race

Henry S. Leads For First Three Eights

The big race is over! Herman Johnson was too much for the brown and won the race in 51 seconds. The race was easy from start to finish. Henry S. taking lead for the first three eights but losing on the home stretch and finished two lengths behind the sorrel.

The result was surprising to some, as the Cardston people were confident of victory and were game to the finish.

About five hundred people witnessed the event, and excitement was high amongst the Raymonds when Herman Johnson galloped in ahead of Cardston's brown.

CHAVES FLEW ACROSS THE ALPS.

Domodossola, Sept. 23.—To Geo. Chaves, the Prussian aviator, belongs the honor of being the first to fly across the Alps.

The daring feat was accomplished today in an attempt to win the prize of \$20,500 offered by the Italian Aviation Society of Milan for a flight from Brig, Switzerland, to Milan.

Chaves, however, was unable to complete the trip, having sustained painful injuries when he alighted here.

As the airman was seen to be slowly descending, great crowds gathered. Slowly and gracefully he neared the surface and was only about thirty feet above the ground

when a gust of wind caught and overturned the machine. It fell heavily, carrying the aviator beneath it. Chaves was pinned under the motor and painfully hurt. He had fainted on striking the ground and was bleeding profusely when released from the wreckage. The machi was ruined.

Injuries are Serious

Domodossola, Sept. 23.—(Later) Chaves' injuries proved to be more serious than was at first thought.

In the hospital to which he was removed the Physicians found that both of the aviator's legs were broken and that the left thigh was fractured.

Other parts of the body revealed bad contusion. The general condition of the airman, however, is not considered to be grave.

TEDDY IS SURE HE WILL WIN

Oyster Bay, N. Y., Sept. 22.—The utter route of the "Old Guard" by Theodore Roosevelt at the Republican state convention in Saratoga was predicted today by Colonel Roosevelt himself.

At the conclusion of a long conference today with half a dozen of the lieutenants, Colonel Roosevelt said, "I think I may be reasonably safe in saying that we shall have one hundred majority, in my opinion," said he, "The Saratoga Convention will adopt a resolution strongly endorsing the administration of President Taft. In accordance with the President's expressed wish no mention will be made or a renomination in 1912."

A GOOD POSITION Can be had by ambitious young men and ladies in the field of "Wireless" or Radio telegraphy. Since the 8 hour law became effective, and since the Wireless companies are establishing stations throughout the country there is a shortage of telegraphers. Positions pay beginners from \$70 to \$80 per month, with good chance of advancement. The National Telegraph Institute operates six official Institutes in America, under supervision of R. R. and Wireless Official and places all graduates into positions. It will pay you to write them for full details at Davenport, Ia., Cincinnati, O., Portland, Ore., or Memphis, Tenn.

"Tis not in mortals to command
success, but we'll do more, we'll
deserve it."—Addison.

Many a man wants more vim
in his home paper, when at the
same time he is carrying dollars
worth of his vim in his pocket.

Am sorry Mr. Editor I cannot
give you any advertisement. I am
troubled with heart disease and
my physician says I must quit
advertising so I can have abso-
lute quiet and rest.

We see by the Lethbridge Herald
that the Raymond Glee Club were
awarded third prize at the Musical
Competition at Magrath which
was held last Thursday evening.
We did not think the Adjudicator
could let such singing go unwarded.

Do you get your Rustler regular-
ly? If not let us know and we
will see that you do get one.
There has been quite a number
of complaints entered at the office
and we want to know all who do
not receive their copy of the
paper.

The Taylor Stake Academy is
going to be opened the first of next
month. What are you going to do
towards helping it along? Are you
going to send your children to it?
Or if you have none, are you going
to attend?

It is the duty of every citizen of
Raymond to BOOST for the Taylor
Stake Academy with all their
might. Talk to everyone about
it. If you have any idea of what
you don't know what to go
with, give it to the Church School
authorities they will find something
to do with it.

And so Mr. ——— doesn't live
some of the things he reads in this
newspaper? Neither do we. But
he is at liberty to pick out what he
doesn't like and leave the rest for
some one less fastidious. Does he
know what they call the man who
sits down at a first class hotel dinner
and beginning at the first item on
the bill of fare tried to eat every
dish mentioned thereon? This
newspaper presents a varied bill of
fare every week, but there is no
law compelling you to devour every
portion of it. Just put aside what
you don't relish and say nothing
about it. And don't swear at the
editor. It's both wicked and foolish.

THE LITTLE WIND

The little wind a gossip is,
Her skirts are full of mysteries.
She lingered by my casement and
she whispered to the rose,
And all the silly butterflies
Are trying to look old and wise,
And blink their goggle eyes at me
like self admiring beaus!

The little wind a wanton is,
She has no sense of decency,
She never keeps a secret, but tells
every thing she knows,
She pauses to tease you,
Her little fingers press you,
And when she's learned your secret
she tells it as she goes.

The little wind a traitor is,
O, yield not to her wiles
But keep your heart well hidden
When you feel her coming
near.

She is like velvet on your face,
Her kisses have a piercing grace,
And then she runs and tells the
birds what you have let her hear.

The little wind a gossip is,
Her skirts are full of mysteries,
She stopped and kissed me on her
way and learned what I hold dear
And all the birds are singing it,
And all the bees are bringing it,
And in the heart of every flower it's
blooming, plain and clear!
N. V. Independent.

FATE

Two shall be born a whole wide
world apart,
And speak in different tongues and
have no thought,
Each of the other's being, and no
need;

And these o'er unknown seas to
unknown lands
Shall cross, escaping wreck, defying
death;

And, all unconsciously, shape every
act
And bend each wandering step to
this one end—

That, one day, out of darkness,
they shall meet
And read life's meaning in each
other's eyes.

And two shall walk some narrow
way of life
So nearly side by side that, should
one turn

Ever so little space to right or left,
They needs must stand acknow-
ledged faces to face!

And yet, with misty eyes that
never meet,
With groping hands that never
clasp, and lips

Calling in vain to ears that never
hear,
They seek each other all their
weary days

And die unsatisfied—and that is
Fate.

The Conservation of National Resources

The general public is confronted at every turn with some indication of popular feeling toward the advantages to be derived not only in the immediate future but in generations to come, by the careful guarding of the natural wealth which nature has spread so lavishly over the world. Governments are spending large sums of money to insure mineral and timber resources for the future.

A little problem in arithmetic might throw considerable light on the value of the work of dealing with prospective criminals during their days of childhood. The average working man has an earning capacity of \$500 per year. He gives to the world 20 years of service which means that he accumulates in a life time the sum of \$10,000. The man of a little higher grade with a little more education is worth at least \$1000 a year to the state. His term of working capacity is 25 years, which means that he adds \$25,000 to the assets of the world in his life time.

It is estimated that it costs \$10,000 to convict and take care of an habitual criminal in a life of 20 years of crime. This means that the state has lost the value of the man's labor to the extent of \$20,000. The habitual criminal is a man whose mental make-up is capable, as a rule, of taking a day standing in matters relating to education. The state not only loses his producing capacity but invests \$10,000 to prevent him from doing harm to and destroying the property of all harmless individuals.

The cost of saving a child to citizenship in many cases does not exceed the sum of five or ten dollars. This includes the feeding of the child in a foster home and his removal from the conditions of cruelty or neglect wherein he

would grow up to be a criminal or an individual with a non-producing capacity. Children in foster homes are so placed that they must of a necessity follow the example which is set in that environment.

The money saving to the estate is apparent to any one who gives the matter a moment's thought. A great deal of credit is given to the man who involves a system or a scheme whereby \$10,000 worth of timber or mineral resources are saved for the state. The children of the nation are as a rule looked upon as a commodity without commercial value, and the tendency is to leave them in conditions of neglect and abuse until such time as they have reached the place where they have become so saturated in crime and delinquency that it is impossible to rescue them, or until such time as they have reached an earning capacity, when they are overworked and propelled to the place of rebellion and revolt.

A child placed in normal home conditions will, as a rule, find example and precedent guiding it naturally and without force into the channels of life which are bound to result in its becoming a normal citizen with normal views of life and its requirements.

The Children's Aid Society is conserving the wealth of the nation by guarding the interests of the child, and is building up hundreds of thousands of dollars of producing capacity for which it deserves unlimited credit and your hearty support. The Superintendent of Neglected Children, Edmonton, gives special attention to letters of inquiry from persons desiring to adopt.

TO OUR READERS!

By special arrangement we offer you a great opportunity to read

"Chantecler"

EDMOND ROSTAND'S wonderful "Chantecler" is the dramatic sensation of the world. In a Rostand play you are bound to find one of the greatest dramatic artists of all times. "Chantecler" is not only the greatest play of the century—it is the one great play of the last hundred years. It is an exquisite story, palpitating with human sympathy and interest. It warms the blood—stirs the emotions—arouses every commendable sentiment. "Chantecler" sparkles with wit—counsels with wise philosophy—entertains with fascinating idiom—the tones of the hour bell of today, and today's problems are heard through the medium of "Chantecler" deliciously up to date slang. No language contains sufficient superlatives to describe it. Only reading and study will enable you to appreciate it. It has aroused all France—London has gone mad over it.

The Only English Translation

Rostand has chosen HAMPTON'S MAGAZINE as the medium through which to present "Chantecler" to the English-speaking world. The publication will be in four installments, one act to each installment. The translator is the same who helped to make "Cyrano de Bergerac" so popular in American bookstores.

We have made special arrangements with the publishers of HAMPTON'S by which our readers may get "Chantecler" and the latest and best features published in HAMPTON'S in connection with our own paper, practically without cost. Read our offer below.

HAMPTON'S MAGAZINE every month contains the most costly, most important and most interesting contents ever put in the covers of a general magazine. "The Own Story" of the discovery of the South Pole, a \$60,000 feature, is now in a most interesting stage, giving the positive "fact" that Commander Peary and his other men discovered the North Pole. "The True History of the Southern Pacific Railroad" by Charles Edward Russell is one of the greatest magazine serials ever published. Mrs. Rheta Childs Dorr's articles on the "Power of the Women's Clubs" are without an equal in their appeal to women everywhere. Fiction contributors include the foremost story-tellers of the day.

Edmond Rostand's "Chantecler" has a new series of "The Own Story" of an "Insomniac" by Edmond Rostand. In several stories the "Own Story of the World with the American Story" by John G. Miller is contributing a series of "The Own Story" of which "The Own Story" is the world's best. The only new idea in dramatic fiction since Sherlock Holmes is provided in the second series of stories about "The Own Story" of the psychological detective, written by Edmond Rostand and William G. MacFarlane. Other Short Stories are by such favorites as O. Henry, Gouverneur Morris, Charles Belmont, Louis, Robert, Hughes, Josephine Darnley, Buxton, Harris, Merton Lyon and many others.
